

Networks International Corp.

Overview & Mission

Networks International Corp. (NIC) is a leading manufacturer of custom RF & Microwave Filters & Assemblies. For over 20 years, NIC has partnered with its customers to transfer value through superior engineering design, manufacturing and continuous support. NIC is SDB (Small Disadvantaged Business) certified by the SBA.

Markets & Applications

NIC serves the Military, Space and Commercial markets providing custom solutions for advanced communication systems. The company's heritage lies in the military market where precision, high reliability and repeatability, and service are mission critical. Typical applications for our products include:

- Communication/Navigation
• Guidance/Surveillance Systems
• Point to Point and Multi-Point Radio Systems
• Radar Systems
• Satellite Systems

Manufacturing

NIC has established global manufacturing centers of excellence to provide cost-effective products with the highest level of quality. Key highlights include:

- Vertically integrated system level testing & automated component testing
• Advanced in-house environmental testing (includes space-level screening)
• High volume production
• Continuous improvement initiatives: SPC analysis & Lean Manufacturing

NIC is ISO 9001:2000 certified and its facilities occupy over 20,000 square feet.

Major Products

Filters & Oscillators:

- Crystal Filters (to 200 MHz)
• Ceramic Filters (to 6 GHz)
• Cavity Filters (to 12 Ghz)
• L.C. Filters (to 6 GHz)
• Multiplexers & Diplexers (to 12 GHz)
• TCXO's & VCXO's

RF Assemblies

- Switched Filter Banks, Phase Shifters, Filter/Amplifiers, Filter/Limiters

Technology

NIC has consistently maintained industry leading design technologies to create a practical, repeatable solution, tailored to your specific requirements:

- 100+ years experience in RF design
• Quick turn prototyping
• Integrated approach from design through production to deliver a cost effective, high quality, repeatable product
